WINBACK

BACK3TX

Winback efficiency, wherever you are

- Wi-Fi
- Single-hand treatment
- Protocols
- Portable
- AI-Ready

The BACK3TX provides access to Winback's synchronized multifrequency innovation in a compact format, without compromising treatment quality.

It enables precise treatments through a single channel (TX electrode, bracelets, or hands-free mode).

Its intuitive interface offers both an Expert mode and an Academy mode with 4 assisted Care protocols (pain relief, strengthening, decongestion, and vascularization).

Synchronized Polyfrequency:

Combine three therapeutic currents to simultaneously target all types of tissue.

High frequency		Medium frequency		Low frequency
TECAR^{RF} Metabolic action	+	**Hi-EMS** Muscle recruitment	+	**Hi-TENS** Pain relief

PATENTED

BACK4

Enhance your treatments, grow your revenue

- Wi-Fi
- Two-handed treatment
- Protocols
- Assisted Care+ protocols
- Portable
- AI-Ready

The BACK4 embodies the highest level of Winback innovation, featuring synchronized multifrequency technology for more effective and differentiated treatments.

It allows you to work with both hands, treating multiple areas of the body simultaneously.

With Care+, you can build your practice by offering comprehensive treatment pathways tailored to your patients' needs (longevity, sports performance, and aesthetics).
